P.M.#446

Dear Howard:

On page 10 of the disclosure on electrostatic filters, P.M.#446, there is a description of printed filters. Dr. Baxt thinks that it is very necessary that this should be covered well. In fact, he is even thinking that it could be a separate application. He, therefore, has asked me to send you some supplementary material on it which consists of a description of the apparatus for the detection of variation of charge and a tracing which shows the variation of charge in the printed dielectric.

Sincerely,

Mrs. Thelma C. Heatwole
Patent Liaison Officer
